Provider Profile

Information provided by the provider describing their agency:

Ädelbrook is approved by the CT Department of Developmental Services as a provider of Individual Home Supports, Community Living Arrangements and Respite Care. We are COA accredited with a long history of working with families and youth who have severe behavior disorders most often caused by trauma in their lives. Over the last few years we have opened two new residential programs for boys ages 13-21. One program is for boys with intellectual/developmental disabilities and behavioral difficulties and another home opened in the summer of 2011 is for boys with on the Autism Spectrum. Formerly many of these boys would have been treated in out of state facilities. Through an arrangement with consultants from the University of Massachusetts Program for Persons with Intellectual Disabilities we incorporate Positive Behavioral Support principles in both residential and school components. We work with families to educate and support their roles as principal caregivers.

We operate a certified Special Education School in Cromwell serving both residential and day students that have emotional, cognitive and behavioral needs. Each student's curriculum is guided by his/her Individual Education Plan (IEP) and includes required coursework, basic skills training, participation in a rotating arts schedule and vocational training.

We provide outpatient mental health services for both children and adults to include medication evaluation and management. We can provide specialized psychological and group and individual counseling with persons with intellectual disabilities. Evaluation and Occupational Therapy services are also available.

We are implementing a system of care as a Center for START Services by expanding our interdisciplinary approach in providing consultation and service linkage planning. Our goal is to assure that those with the diagnosis of Developmental Disabilities, PDD and mental health needs are able to access several levels of care through a single portal, easing the burden on them and caregivers.
